PORTRAIT DISPLAYS

SpectraCal

SPECTRACAL C6-HDR

ADVANCED COLOR MEASUREMENT DEVICE

Accurate luminance and chromaticity readings for any display type.
Now including High Dynamic Range displays.

Precise Accuracy

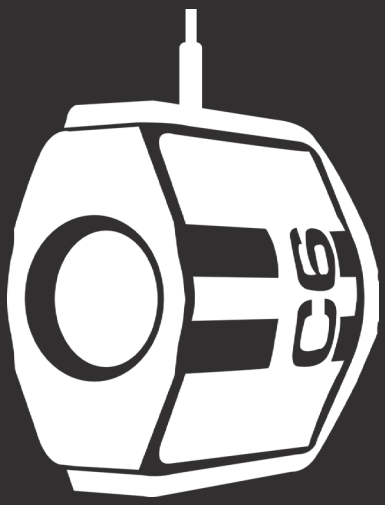
Advanced filters provide unparalleled accuracy for the price point.

Accelerated Speed

Unique firmware provides exceptionally fast readings when used with CalMAN.

Increased Lifespan

Sealed optics and sensors ensure accuracy and reduce drifting over time.



High Dynamic Range

Accurate HDR measurements to complement CalMAN's HDR capabilities.

Advanced Handling

Excellent low-light handling for detailed black-level calibrations.

Convenient Versatility

Includes built-in ambient light diffuser as well as tripod extension hardware.

Advanced Technology

Complete spectral characterization provides precise measurement tables for any current or future display technologies, including OLED and GB-R LED.

NIST Certified+

Every C6-HDR colorimeter receives a National Institute of Standards and Technologies (NIST) certificate of accuracy plus a certificate of accuracy at high luminance.

Field-Upgradeable

Calibration tables and supported display technologies are automatically updated when the C6-HDR colorimeter connects with CalMAN software.
