

# CALMAN 2016 **ULTIMATE**

## DISPLAY CALIBRATION SOFTWARE

The complete color calibration solution for any setup.

### Computer Monitors

Use 1D LUTs and ICC profiles to correct the output of computer monitors.

### Production Studios

Calibrate any screen in a production studio, including grade-1 monitors.

### Flat Panel Displays

Adjust the picture settings of an HDTV or 4K display to match industry standards.

### Projectors

Calibrate front or rear projection displays to industry color standards.

### Video Walls

Color-match adjacent panels in a multi-panel video wall.

### Medical Monitors

Calibrate medical imaging displays to international DICOM standards.

### Automated Profiling

With CalMAN's acclaimed automation features, profiling and analyzing the color performance of a display or monitor is fast, automated and highly accurate.

### Advanced 3D LUTs

CalMAN provides the latest, most advanced technology for creating corrective 3D LUTs and is faster and more accurate than any other calibration software.

### Hardware Integration

SpectraCal works closely with its industry partners to provide calibration solutions that integrate seamlessly with existing devices and applications.
